

First Floor, 1,588 square feet

The corner setting of this fireplace is heartwarming.

Downstairs bedroom opposite a full bath. Nice for guests, in-laws, etc.

Imagine:
You can opt for a complete Baking Center. A godsend, even if you use a bread machine.

A classic craftsman style stair railing, elegant in its simplicity.

"THE PARISI"

CANTATA

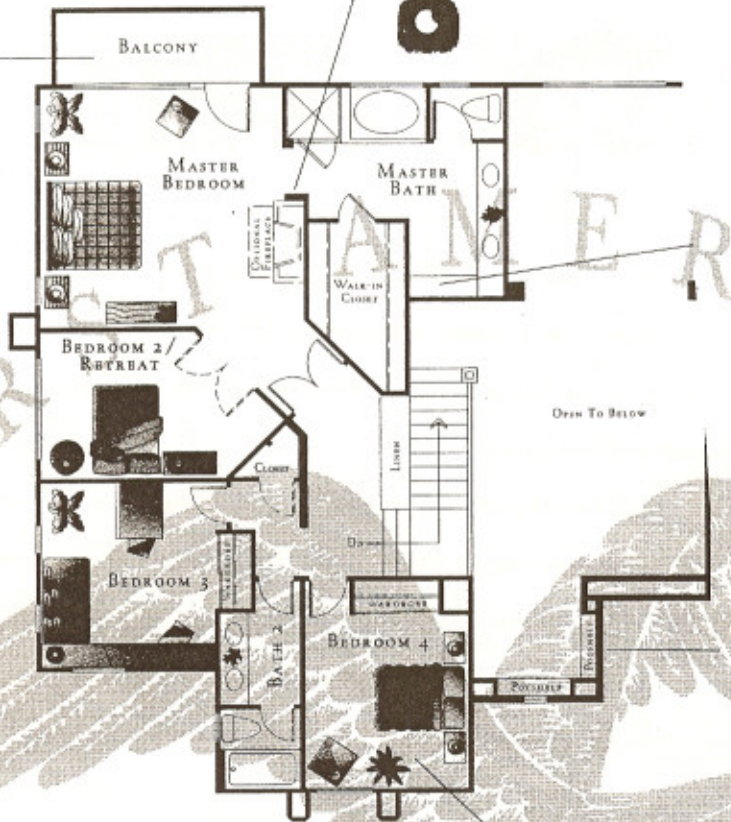

Second floor, 1,265 square feet

You can opt for a fireplace up here as well. Nice for crisp nights.

Take in the coastal breezes off your balcony.

Imagine: You have the flexibility to open the wall to the master, and make this a great retreat.

You'll have five of those spaces we call bedrooms. But you can make them an office, sewing room or fitness room. Unless your family's the Brady Bunch.
